# Overview

- Excessive Heat Warnings, Watches and Heat Advisories
  - Confidence is high for an impactful several day heat wave across southern California next week.
  - Excessive Heat Warnings and Watches have been issued for next Monday through Thursday for southern California and parts of the Central Valley.
  - A Heat Advisory may be issued for coastal communities just inland from Huntington Beach to San Diego.
  - Heat will spread north Tuesday and Wednesday of next week. An Excessive Heat Watch may be issued soon for inland counties as far north as Redding.
  - At this point, any heat event for parts of Northern California is expected to be in effect only for a few days.
  - Overnight temperature recovery will be poor.

# **WEATHER OF CONCERN**

## **Weather of Concern**

#### Northern California:

• Moisture originating from western Mexico will move northward over the next few days. Isolated thunderstorms will be possible, mainly across Northern California mountains through the weekend.

#### Southern California:

- · Excessive Heat Warning Monday through Thursday for inland areas.
- Wednesday will see dangerously high heat throughout the forecast area, with high to very high heat risk values in the majority of the valleys and inland locations, with moderate heat risk elsewhere.

## **Active Weather Warnings, Watches and Advisories by County:**

# **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

\*\*\* High Risk due to Lightning Mid Coast to Mendocino, NW Mtn, Northern Sierra and Far Eastside Saturday-Saturday night and NW Mtn, NE CA, Northern Sierra and Far Eastside Sunday-Sunday night\*\*\*

Another monsoon surge will impact the region through Monday. Moist unstable air is moving northward and isolated thunderstorms may reach as far north as the Lake Tahoe area this evening. On Saturday showers and thunderstorms are expected over the higher terrain both east and west of the Sacramento Valley, but not quite as far north as the OR state line. Sunday will be about the same, but with less activity in the west and more in the north. Over time thunderstorms will produce more rainfall, and by Monday thunderstorms will be producing plenty of rainfall and be confined only to our eastern areas. The areas expecting thunderstorms Saturday and Sunday have a High Risk of significant fires.

Hot temperatures will remain the next 7 days although the added cloud cover and monsoon Moisture push will take the edge of the afternoon heat. Far NW CA will have gusty NE winds (25-30 mph) and low Relative Humidity (RH) over the higher terrain through Saturday, and any thunderstorms could produce outflow gusts to 35 mph. Otherwise, only typical summer slope and sea breeze winds are expected. Dry and warmer weather will return to all areas except along the immediate coast beginning Tuesday.

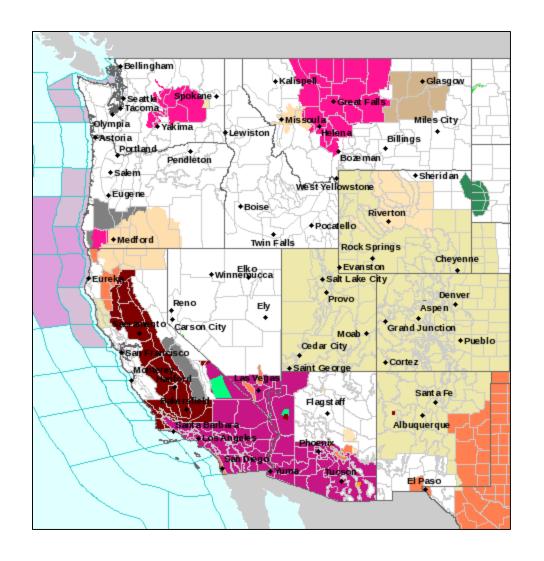

#### **SOUTHERN CALIFORNIA**

- \*\*\*Scattered wet thunderstorms over the Sierra through this weekend\*\*\*
- \*\*\*Hot and dry next week\*\*\*

South flow aloft around high pressure currently centered over New Mexico will bring scattered afternoon showers and thunderstorms to the Sierra through this weekend. Maximum temperatures will be near normal through Saturday, with mid 70s to mid 80s across the mountains and upper 80s and 90s in the valleys. Minimum humidity will be mainly between 20% and 40% through Saturday. The high over New Mexico will move westward starting Sunday and then be directly overhead Tuesday through the end of next week. This will end the shower and thunderstorm threat over the Sierra and bring a significant warming and drying trend to the region. Triple digit heat will be widespread across the valleys and foothills and minimum humidity will drop into the single digits and teens away from the coast Monday through the end of next week. North nighttime winds of 15 to 25 mph with gusts to 40 mph will surface across much of Santa Barbara County and the Grapevine Sunday through Thursday.

# Cal OES LAW ENFORCEMENT MISSIONS

## **Ongoing Cal OES Law Missions**

- 2018-LAW-48521, 07/19/18, 2100 hours: IERCC advising of an InReach "SOS" activation at GPS coordinates 36° 33' 47"N -118° 16' 44"W, plotting on the Mt. Whitney Trail at an elevation of 12,019 feet. The registered owner (R/O) group came upon an elderly Asian male throwing up blood and having difficulty descending down the trail. At 2112 hours, LDO relayed activation information to the Inyo County Sheriff's (ICSO) dispatch who activated a SAR response. Update: 07/20/18, 0014 hours, ICSO advising they had been in contact with the hiking group via texting and made the determination the group would bivouac with the victim on-trail and CHP H-40 would attempt to hoist at first light. IERCC advised. Update: 07/20/18, 0723 hours, ICSO advising CHP-H40 attempted to make it to the given coordinates but were unable to due to the conditions. ICSO advising they had been in contact with hikers who said the victim was still unable to descend on his own due to his medical condition, which had not improved. ICSO requesting a hoist helicopter capable at elevation greater than 12,000 feet. At 0745 hours, LDO requested CaNG CH-47 to assist and CaNG accepted mission. Mission Ongoing.
- 2018-LAW-48237, 07/19/18, 0800 hours: Yosemite National Park Law Enforcement Rangers contacted the Cal OES Law Duty Officer (LDO) and requested assistance in locating and recovering human remains in the area between Lower Yosemite Falls and the Merced River. Partial remains had been located near the lower falls. Marin Sheriff's Office (SO) Search and Rescue (SAR) is conducting planned training in the park through 07/18/18 and will assist National Park Service (NPS) Rangers beginning 07/19/18. Mission Ongoing.
